🔗 PORTFOLIO

📄 PROFILE

With a background in linguistics and philosophy, I ventured into the world of programming out of curiosity. My journey into coding and researching technologies revealed that my expertise in language analysis and logical reasoning is highly valuable in software development. These skills not only align seamlessly but also enhance my ability to solve complex problems creatively and effectively.

Through this interdisciplinary approach, I have developed a unique perspective that I am eager to bring to a new team to drive innovative solutions and deliver impactful results.

📁 PROJECTS

Fast Delivery

01/2024 – 04/2024

Application for last-mile logistics companies. It allows monitoring shipments from the administrator role and includes an interface for delivery drivers, where they can select packages and control the status of their account.

- I worked on both the front end and the back end.
- Technologies: Typescript, Next.js, Tailwind CSS, Jest, Docker, Sequelize, PostgreSQL, S3, AWS.

Scheduling App (JavaScript Bootcamp)

11/2023 – 12/2023

This group project consisted of producing a web application that provides companies with a platform enabling their customers to schedule appointments.

- I worked on both the front end and the back end.
- We used the SCRUM methodology and presented our progress weekly in front of a jury. We utilized Trello and Github.
- Technologies: PostgreSQL, Sequelize, Node.js, Sass, Material UI, Express.js, React.js, and Redux.
