👤 PROFILE

My background is in Literature and Philosophy, and I took my first steps into the world of programming out of curiosity. When I took my first course at Platform 5, an online school, I realized that my passions and the areas where my motivations lay (focused on the study of language and logic) were not only compatible but also complementary and consistent. Today, having successfully completed the JavaScript Bootcamp, I am convinced and highly motivated to continue learning and to dedicate my future to web development.

🧠 SKILLS

JavaScript • HTML • CSS • GIT • React • Redux • Express • Node.js • Sequelize • PostgreSQL • SASS • Bootstrap • Tailwind

📂 PROJECTS

Fast Delivery
01/2024 – 04/2024
Application for last-mile logistics companies. It allows monitoring shipments from the administrator role and includes an interface for delivery drivers, where they can select packages and control the status of their account.
- I worked on both the front end and the back end.
- Technologies: Typescript, Next.js, Tailwind CSS, Jest, Docker, Sequelize, PostgreSQL, S3, AWS.

Scheduling App (JavaScript Bootcamp)
11/2023 – 12/2023
This group project consisted of producing a web application that provides companies with a platform enabling their customers to schedule appointments.
- I worked on both the front end and the back end.
- We used the SCRUM methodology and presented our progress weekly in front of a jury. We utilized Trello and Github.
- Technologies: PostgreSQL, Sequelize, Node.js, Sass, Material UI, Express.js, React.js, and Redux.
